DOGWOOD VETERINARY HOSPITAL AND LASER CENTER

“ Your Other Family Doctor ”

American Animal Hospital Association (AAHA) sets the benchmark of excellence that requires us to use the latest state-of-the-art equipment, maintain the highest certification for our personnel, and keep up to date on all changes in Veterinary Medicine and Treatment.

We have been accredited by the American Animal Hospital Association since 1991 and continue to strive for nothing less than excellence!

Our hospital was the first to provide **24-Hour Emergency Care** to our existing Clients and their loved ones. We set the pace and the standard for quality care!

YOUR PET'S CAREGIVERS

We work hard to maintain an excellent staff of doctors, technicians, and receptionists. Our staff is a GREAT team, with the right mix of skills and backgrounds, and has been carefully chosen to provide the best care for your pet. All staff members participate in continuing education programs and have special interests or areas of expertise within the practice. All, of course, have pets of their own.

Dogwood Veterinary Hospital and Laser Center is always there for you!

(770) 253-3416

Dogwood Veterinary Hospital and Laser Center is committed to educating our clients in proper pet care including wellness programs, diet and nutrition and injury prevention.

FROM PEDIATRICS.....

- **First Puppy & Kitten Visit**

- **Nutritional Counseling**
- **Microchipping**
- **Dental Care**
- **Flea & Heartworm Control**

STATE OF THE ART

STATE OF THE HEART

Class IV K LASER THERAPY was developed for human use, this device has now been implemented for Veterinary Care.

Laser Therapy is proven to bio-stimulate tissue repair and growth. The Laser accelerates wound healing, and decrease inflammation, pain, and scar tissue. When it comes to pain management, Class IV Lasers provide dramatic results.

DIGITAL RADIOLOGY provides a quick, easy way to assist in the diagnosis of bone issues, muscular skeletal, gastrointestinal, and other internal organs.

Instant and accurate radiographs are quick and reduce the stress on your pets. They provide a permanent record that could be emailed for further study.

LASER SURGERY is the most advanced surgical technology. The precision of the Laser allows our surgeon to only affect or remove the target tissue, leaving the healthy surrounding tissue untouched.

The laser seals nerve endings and blood vessels resulting in **less pain, bleeding, and swelling.**

• Radiology and Ultrasound TO GERIATRICS.....

- **Cardiology**
- **Dermatology**
- **Internal Medicine**
- **Pain Management**
- **Senior Wellness**
- **General Surgery**
- **Orthopedic Surgery**
- **Advanced Anesthesia**
